EXPERIENCE

Stingray Technologies, Walnut Creek — Founder

January 2019 - PRESENT

Software engineering, product development, and marketing of five different software products and proofs of concept.

Adecco at Google, San Francisco — Software Engineer

December 2016 — December 2018

Developed new features for, migrated, and maintained Waze.com/brands and marketing sites as well as internal tools. While there, I used Closure, Django, Goro, Kintaro, code reviews, Google App Engine, and Pantheon

TouchPoint Promotions, Mesa, AZ — Software Engineer

May 2015 — December 2015

Developed frontend for client websites including Big O Tires, Continental Tires, and HTC. Redeveloped backend spaghetti code in OOP structure.

EDUCATION

Diablo Valley College — Assoc. Of Science Computer Science*

December 2019

Object Oriented Programming with C++ as well as Java; assembly, web development; App development; Intro to Unix and Linux Systems

Diablo Valley College — Assoc. Of Science Mathematics*

December 2019

Calculus III, Differential Equations, Linear Algebra, Discrete Mathematics

Arizona State University — B.S. Computer Science (incomplete)

Fall 2014 — May 2015

Dean's list

PROJECTS

Make Data Searchable — Spreadsheets to Website

Improve the public's ability to find information in spreadsheets through search engines by converting them into websites. Flask backend.

GroupChant — NBA Finals Chatroom

Web app to facilitate chat for fans of Warriors and Raptors during NBA finals. Elixir / Phoenix Framework (with channels), PostgreSQL backend.

WoW Classic Raids — Community for World of Warcraft

Community to help players form guilds. ~60k pageviews per month and ~5% week over week growth rate in registered users. Outreach, marketing, and SEO for growth. Elixir / Phoenix, PostgreSQL backend.

API2Site — GraphQL meets Wordpress

SaaS to convert APIs into websites for non technical users. Renders site on backend for SEO and mobile. Node, Express.js, MongoDB backend.

Give And Get Leads — Giveaway Service for Lead Generation

SaaS centered around weekly/monthly giveaways to clients' audience with referral, social, chat, and gamification builtin. Firebase backend.

SKILLS & ABILITIES

- Dive into a new codebases to fix bugs as well as understand how the codebase is structured
- Learn quickly (developed in four different backends over the last year.)
- Think in systems.
- Develop while keeping product and business goals in mind.
- Lead (Founder, Eagle Scout, Senior Patrol Leader)
- Communicate well (among engineers; intra-company; and with clients / customers)

CERTIFICATES

Advanced C++ Programming*

Computer Architecture*

Mobile and Enterprise Java Programming*

Program Design*

LANGUAGES & TECHNOLOGIES

Python (Django, Flask, NLTK, Spacy.io, Pandas, Anaconda, SciPy, BeautifulSoup, Requests, Selenium Web Driver), **Javascript** (Node, Express, Closure, JQuery, Lodash, AJAX, Puppeteer, ReactJS), **Elixir** (Phoenix), **CSS** (SCSS, LESS, CSS3, Twitter Bootstrap), **Databases** (PostgreSQL, MySQL, MongoDB, Cloud Firestore), **Git**, **PHP**, **C++**, **Bash**, **Google App Engine**, **Responsive Web Development**, **Firebase**, **RESTful APIs**, & more
